## WASTE TRANSFER, SIMPLIFIED.

### Transfer Solids up to nearly 2-inches

Let's face it...you don't want to think about your waste water pump. Now you don't have to. You have processes to keep running and demands to meet. Graco designed the Husky 2150LP to pump everything. A powder-coated aluminum body, external air-valve, and 2-inch flappers will pump whatever you've got, wherever you need it to go.

### Low Maintenance

- Durable Finish: The only powder-coated flapper pump available.
- External air valves are replaced in a few minutes unlike air valves seen on other pumps.
- Pass solids up to nearly 2-inches without clogging.

## CONTACT US FOR DEMOS OR MORE INFO

The Husky 2150LP pump is built to handle your toughest jobs. But don't just take our word for it. You can arrange a live or online demonstration by calling 866.348.3188 or visiting [www.graco.com/Husky2150LP](http://www.graco.com/Husky2150LP). See for yourself the power of Husky LP.
